#### *Election/Restriction*

1. Claims 1-7 are generic to a plurality of disclosed patentably distinct species comprising various indicators (claim 2) and analytes of interest (claim 7). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

2. Election from the following species is required. Note: applicant must elect *one* species from *each* group below.

Species 1: Type of indicator

Applicant is required to elect, for purposes of search, a single type of indicator from those set forth in claim 2.

Species 2: Type of "analyte of interest"

Applicant is required to elect, for purposes of search, a single type of "analyte of interest" from those set forth in claim 7.

3. The species are distinct, each from the other, because their structures and/or modes of action are different. For each of the different indicators and analytes of interest, they differ in

their reactivity and/or the starting materials from which they are made. Moreover, each of the species could be separately classified. Therefore, the species have different issues regarding patentability and represent patentably distinct subject matter.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Because the above restriction/election requirement is complex, a telephone call to applicants to request an oral election was not made. See MPEP § 812.01.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is also reminded that a 1 - month (not less than 30 days) shortened statutory period will be set for response when a written requirement is made without an action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a). Such action will not be an "action on the merits" for purposes of the second action final program, see MPEP 809.02(a).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maurie Garcia Baker, Ph.D. whose telephone number is (703) 308-0065. The examiner can normally be reached on Monday-Thursday from 9:00 to 6:30 and alternate Fridays.
